

# PREMIUM PORCELAIN-ON-STEEL SOAKERS

## PROVEN STRENGTH

Known for its strength and pliability, steel has the perfect mix of properties to build bathtubs that last. Briggs Baths has pressed durable tubs out of steel since 1938!

## BRILLIANT AND BEAUTIFUL

The brilliance of porcelain is timeless and classic. Its delicate finish is matched only by its tough performance—the perfect canvas for showcasing tile walls.

## GENUINE VALUE

Innovations like our proprietary Liberty Backing system deliver cast iron quality at up to half the price. It's the lighter-weight, easier-to-handle alternative!

## A DEEPER, MORE RELAXING SOAK

Better than your average steel tub, Briggs Bath tubs are built for soaking. With comfort features like a reclined backrest, extra-deep well for an immersive soak, and available full-cast insulation for maximum heat retention and sound absorption, Briggs Baths are built for long, indulgent dips.

## LIBERTYCAST PLUS 32

Model # 2642 130/2643 130 (RH / LH)

Dimensions: 60" x 32" x 16 5/8"

## LIBERTY BACKING

Premium models feature our proprietary backing system of full-cast foam insulation and engineered composite coating. Its heat retention and sound absorption properties create the quietest baths that stay warmer longer, and protective attributes guard against handling and transportation damage.
